

## **Dynamic .NET TWAIN: Integrated Document Processing All in One**

*Barcode Reader, Annotation and Webcam add-ons are available*

Vancouver, BC – Dynamsoft Corporation, a leading provider of [TWAIN SDKs](#) and [version control tools](#), today launched a new version of its essential document scanning component - Dynamic .NET TWAIN 4.0. It now can be integrated with [Barcode Reader](#), [Annotation](#) and [Webcam](#) add-ons into a larger, all-in-one document acquisition and imaging system. All add-ons are detachable which make them customizable and adaptable to different preferences.

Dynamic .NET TWAIN, along with its add-ons, enables users to conveniently capture documents from scanners, webcams or capture cards and deliver scanned papers to your system (local folder, server or database). With the libraries, you can easily get 1D and 2D barcode info from scanned documents, IDs, or invoices. For future references, you can put notes/comments directly on the images before achieving.

One of the customers commented after evaluating Dynamic .NET TWAIN. "I have downloaded and used Dynamic .NET TWAIN trial, and it provides all the functionality we are looking for except the barcode recognition. I tried the separate barcode sample you sent earlier, and it seems to work pretty well. "

Dynamsoft is constantly thinking about increasing efficiency for customers, ranging from the agile designing, easy integration with .NET applications, to its robust functions. After all these add-ons, Dynamsoft is planning to release [OCR Add-on](#) soon. With the library, you'll be able to OCR (Optical Character Recognition) your documents and convert them to searchable PDF and text files. Stay tuned!

### **About Dynamic .NET TWAIN**

Check out the [overview page](#) for detailed information. You can also download the [30-day free trial](#) to try out the component.

### **About Dynamsoft**

Being an associate member of TWAIN Working Group, Dynamsoft not only has early access to the latest TWAIN standard, but also contributes to the TWAIN standard by proposing and voting for changes.

Every year, thousands of customers turn to Dynamsoft for world leading version control solution and TWAIN SDKs. Dynamsoft version control tools are used globally by thousands of developers including Apple, EMC, Fujitsu, GE, HP, 3M, HR Block, IBM, InfoSys, Intel, Olympus, PricewaterhouseCoopers, Samsung, Siemens, Symantec, Philips, Verizon, Unisys and others.
